

# ZETA POS

 ZETA POS

Zeta POS can be integrated with inventory, purchase orders, sales order and back end accounting. It can also be integrated with CRM, HRMS and document management modules. Designed for the needs of independent retailers, the POS system helps you to run your business rather than just report on it. Much more than just POS software, Zeta is a complete Integrated Business Management System that will help you to control of your business from front counter sales, to the storeroom, to your back office accounting, and everything in between.

Zeta POS can manage your business from end to end by updating sales information in inventory and financial modules. It also shares information throughout branches. It allows you to maintain absolute control over sales and inventory while presenting an easy customer checkout process. It is a great solution for both sales and counter.

Zeta POS has evolved into a cutting-edge system while simplicity has remained a priority. It will enhance your operation, providing increased speed, accuracy and control of your inventory - all of which lead to increased profits and more time to focus on growing your business. Zeta POS interface is easy to navigate, and is compatible with touch screen terminals and barcode scanners, helping to save time when ringing up sales and preventing cashier errors. The POS system can also apply discounts and a promotion, report on sales by sales person or item, and is an asset in inventory management.
